

# THE EFFECT OF THE RADICAL GREEN AGENDA ON AFRICA

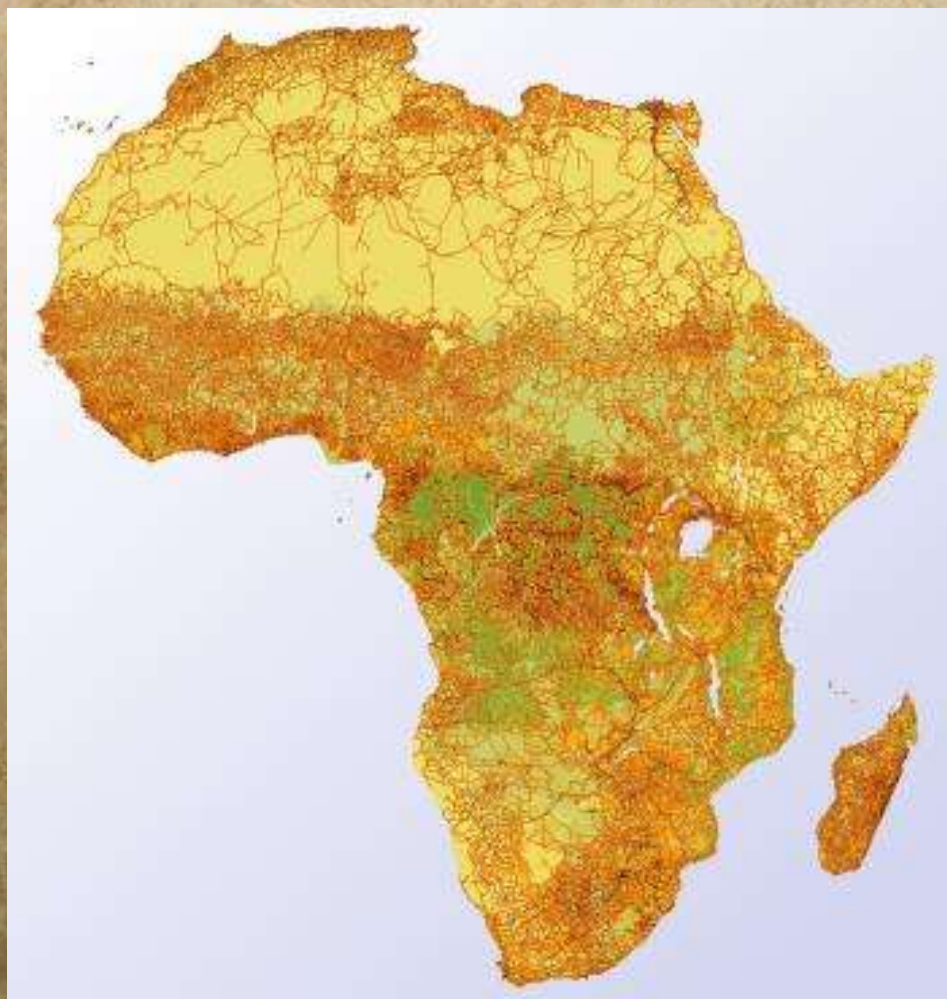

"RADICAL ENVIRONMENTALISM  
FAILED; WHETHER RADICAL  
ENVIRONMENTALISTS ADMIT IT OR  
NOT, THEY FAILED."

JAMES JOHNSTON

FOREST SERVICE EMPLOYEES FOR ENVIRONMENTAL ETHICS

USA TODAY-NEWSPAPER (ONLINE) 7-22-07

# Uganda

# ETHIOPIA

# DARFUR

# YELLOWSTONE NATIONAL PARK

## US PARKS SERVICE MODEL

### Restrictions Against:

- Hunting
- Herding
- Farming
- Gathering
- Cutting trees
- Collecting medicinal plants.

# AMBOSELI NATIONAL PARK

# Traditional Maasai Herding

# Conservationists Demonize Masaai

As a result:

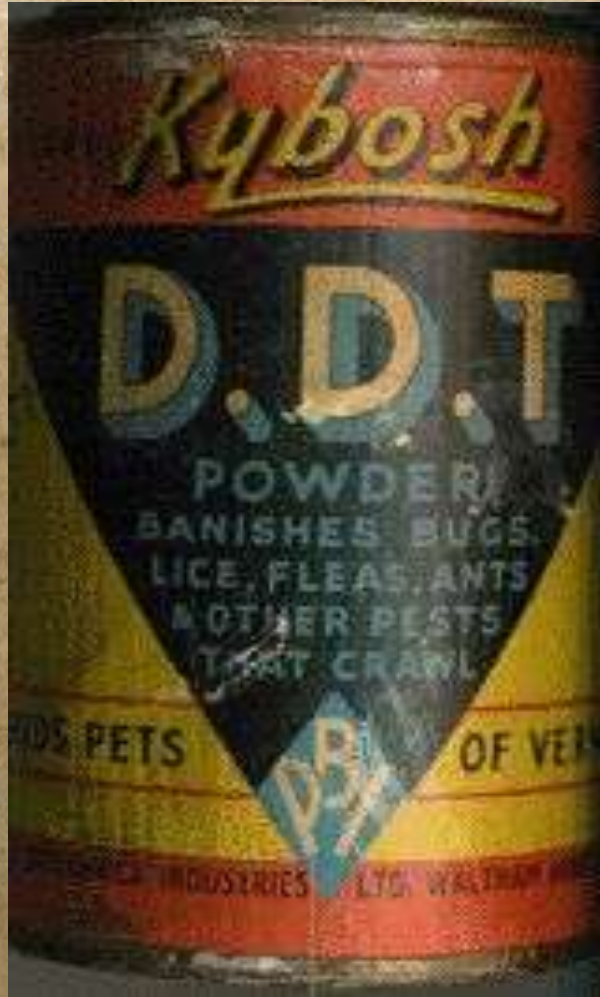

- Removed from so-called key areas
- Herd sizes restricted
- Their land was privatized through group holdings (in Kenya)

# MODERN MAASAI VILLAGE

## SUCCESSFUL APPLICATIONS OF DDT

- Stopped typhus epidemics;
- Successfully eradicated malaria in North America and Europe; and
- Significantly reduced malaria outbreaks in Africa and the Far East.

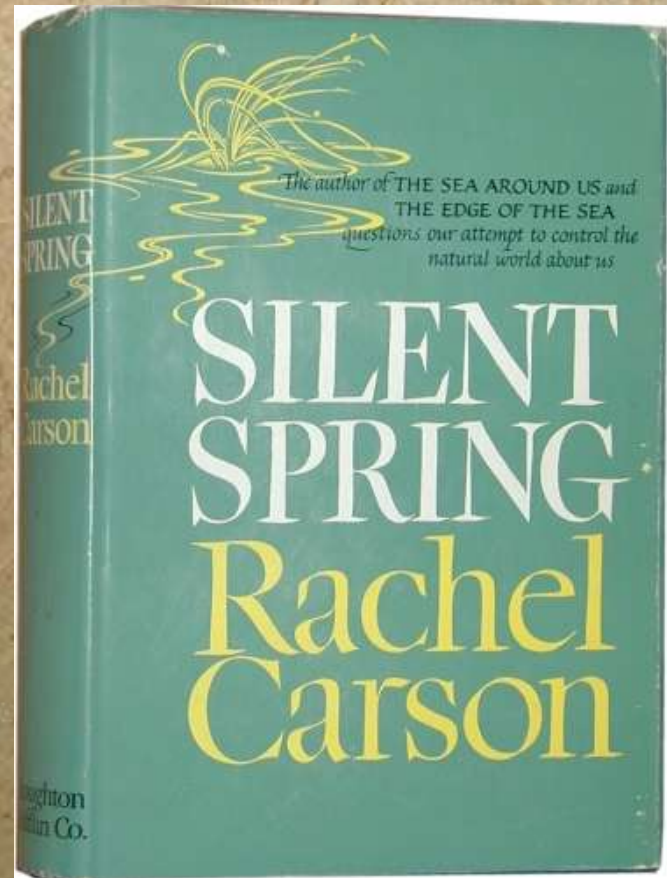

## HARMLESS TO HUMANS

- DDT has virtually no adverse effects on humans; and
- For more than fifty years DDT has been used, studied, analyzed, and debated--there has been no evidence of DDT's causing harm to humans.

# THE FUZZY SCIENCE BEHIND THE DDT BAN

"Millions of Africans - far too many of them children - are suffering from malnutrition and hunger. Agricultural biotechnology offers a way to stop the suffering... To deny desperate, hungry people the means to control their futures by presuming to know what is best for them is not only paternalistic but morally wrong."

Hassan Adamu  
Nigerian Minister for Agricultural and Rural Development

# Modifications to Corn:

- Resistant to insect pests;
- Reduce the need for pesticide use;
- Increase crop yields; and
- Reduce impact on arable land.

## VITAMIN A

- Impairs intellectual development;
- Lowers body's resistance to disease; and
- Increases mortality due to—
  - Malaria;
  - Measles; and
  - diarrhea.

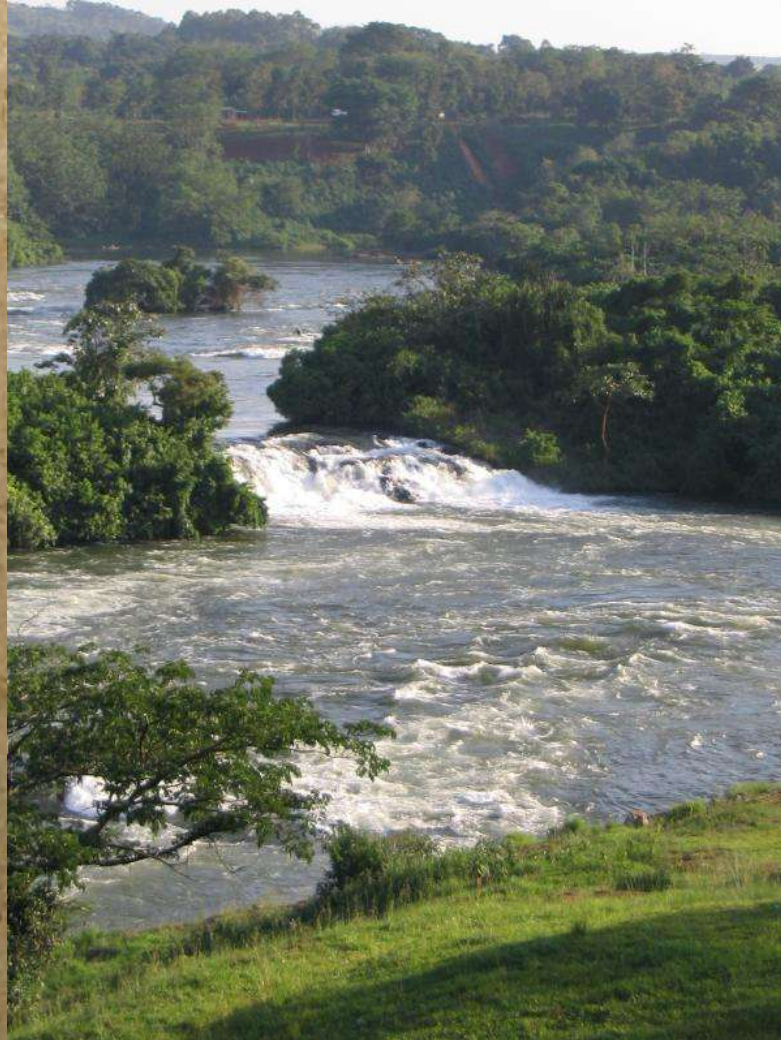

# When radicals Win

Africans continue to:

- 1) Drink contaminated water;
- 2) Eat spoiled food; and
- 3) Cook and heat burning wood and dung.
  - 10 million souls die each year.

# BUJAGALI FALLS

## RADICAL COALITION

- 1) Greenwatch;
- 2) National Association of Professional Environmentalists (NAPE);
- 3) Uganda Wildlife Society (UWS);
- 4) Advocates Coalition for Development and Environment (ACODE); and
- 5) Save Bujagali Crusade.

## NEWSWORTHY

Once issues become high profile, they become news:

- 1) possible to give information directly to the press;
- 2) Free media coverage at key points in process;
- 3) Strategic release of supporting data and info;
- 4) Credentialed “expert” sought by media.
- 5) Opinion becomes policy.

## COALITION WEAKNESSES

- 1) lack of funding;
- 2) lack of political clout;
- 3) lack of experience in advocacy; and
- 4) lack of mass support for their position.

## ENVIRONMENTALIST INTERFERENCE

- 1) individual lifestyle choices;
- 2) state autonomy in domestic governance; and
- 3) unnecessary worldwide product bans.

## EMPIRICAL OUTCOMES

The Results:

- 1) Breakdown of society; and
- 2) Devaluing of life.

## NEGATIVE POLICY OUTCOMES

# NATIONAL RETALIATION

"RADICAL ENVIRONMENTALISM  
FAILED; WHETHER RADICAL  
ENVIRONMENTALISTS ADMIT IT OR  
NOT, THEY FAILED."

JAMES JOHNSTON

Have they transformed a limited assault on America into a worldwide vendetta for developing nations everywhere...especially Africa?
